

Jackson Ultima Sizing Chart

DO NOT USE SHOE SIZE AS A REFERENCE. SKATES AND SHOES ARE SIZED DIFFERENTLY.

Here are a few tips to assist in selecting the correct size:

Take measurements in the socks that will be used while skating. Or, when referring to the sizing chart, add some extra room for socks.

- Stand on a sheet of paper.
- Have someone else place a mark at your longest toe and at your heel. The pen should be straight up and down to determine the proper length.
- Remove the foot and measure the distance between both marks in inches; repeat with your second foot.
- Using the longer measurement of your two feet, select the most appropriate size. Do not select a size that is smaller than the length of your longest foot.
- To find your width, measure the circumference of the ball of the foot in inches. In other words, measure all the way around the widest part of the foot. If you only measure the bottom flat part of your foot, then you will not be able to determine your skate width.
- Children may need a little extra room for growth

ADULT SIZES			WIDTH - Circumference around the widest foot part (ball-of-the-foot)					
Women's Sizes	Men's Sizes	Foot Length	R (A - B)	W (C - D)	A	B or N	C or M	D or W
4	2 1/2	8 5/8	7 1/2 - 7 11/16	8 1/16 - 8 1/4	7 1/2	7 11/16	8 1/16	8 1/4
